• **CapraSite™** is a blend of 17 different herbs and botanicals designed to support good intestinal health.
• Contains **caprylic acid**, a potent medium chain triglyceride, that occurs naturally in goat milk cream.
• Unique whole foods such as pumpkin seeds, black walnut, and wormwood deliver intestinal support.
• Provides tonic (health enhancing) mushrooms traditionally used to support a healthy immune system.
• **CapraSite™** is made with only all-natural ingredients.

**Why CapraSite™?**

**CapraSite™** combines 17 different herbs and botanicals from organic, wildcrafted, and all natural sources. These botanicals, herbs, and medium chain triglycerides work in harmony with one another to gently but effectively combat unwanted growth in the intestinal lining. These ingredients, while effective at providing broad spectrum support against many common pathogens, do so in a manner that spares and preserves much of the gastrointestinal microbiota.

**Parasites 101**

The World Health Organization estimates that 3.5 billion people suffer from a parasite infestation. Parasites are opportunistic invaders which means they take advantage of a host when the intestinal ecosystem is unhealthy or the immune system is compromised. Parasites and worms are scavenger organisms living within, upon, or at the expense of the host. They reside in the gastrointestinal tract and feed on toxins and waste material within the body. The danger of these uninvited visitors exists in that they become extremely toxic, and even deadly, as waste materials are expelled in the host’s body. A parasite cleanse can grant relief to those suffering from a parasitic infestation.

Our immune system is the first line of defense against invading bacteria, viruses, and parasites. Staying healthy requires this system to be maintained free of additional burdens, such as parasites, so that immune function is not compromised.

**Ingredients List:**

**Para-gone Blend:** 600 mg
Garlic, Pau d’Arco, Plantago Ovata, Papaya leaf, Pumpkin seed

**Mushroom Blend:** 500 mg
Turkey Tail (Coriolus versicolor - 25% polysaccharide), Shiitake (Lentinula edodes - whole mushroom), Maitake (Grifola frondosa - whole mushroom)

**Intestinal Blend:** 325 mg
Caprylic acid, Ginger, Organic Slippery Elm, Organic Rosemary

**Botanical Blend:** 190 mg
Grapefruit, Black Walnut 4:1, Wildcrafted Oregon Grape, Wormwood (Artemesia Absiathae)

**Other Ingredients:**

- cellulose (vegetable source)

**Initial Use:** Take 1 capsule three times per day on an empty stomach.

**Maintenance Use:** 1 capsule each day on an empty stomach.

**Discontinue Use If:** you experience abdominal pain, vomiting, diarrhea, nausea, headaches, fatigue or allergic reaction. Consult a physician if any of these symptoms occur.

No Pesticides
No Preservatives
No Chemicals
All Natural

CapraSite™ Features:

**Caprylic Acid:** Named after the medium chain triglycerides found in goat milk cream, this eight-carbon saturated fatty acid is known for its therapeutic use as a preventive as well as therapy for candidiasis and fungal infections. Studies show that caprylic acid has a toxic effect on microorganisms, particularly lipid-coated bacteria such as Staphylococcus aureus and Streptococcus. Caprylic acid is such a potent natural antimicrobial substance, it is used in commercial settings as an all natural sanitizer.

**Garlic:** Known for centuries as “nature’s antibiotic”, garlic protects and enhances the immune system. One double-blind, placebo-controlled study found that those supplementing with garlic were significantly less likely to get a viral infection and if they were infected recovered much faster than those receiving a placebo.

**Pau d’Arco:** The dried bark of the Tabebuia tree (Trumpet tree). The bark contains naturally occurring flavonoids such as quercetin. It has been used for centuries to improve wellness.

**Coriolius Versicolor:** Also referred to as Turkey Tail, it is a protein-bound polysaccharide K (PSK) that was first extracted in Japan in 1965 and is a recognized medical mushroom in Chinese medicine. It has been well documented to boost immune function.

**Grifola Frondosa:** For hundreds of years, this rare mushroom has been used in Japanese health care because of its ability to support the immune system. This mushroom is rich in minerals (potassium, calcium, and magnesium), vitamins (B2, D2, niacin) and antioxidants.

**Leptinula Edodes:** This cultivated mushroom, known as shiitake, dates back over two thousand years in Japan. It contains beneficial properties that help it to boost immune function. One study found that consuming the alpha-glucan-rich compound, AHCC (Active Hexose Correlated Compound), extracted from shiitake mushrooms may enhance immune function.

**Papaya Leaf:** Papaya leaf is rich in antioxidants such as lycopene, beta-carotene, and beta-cryptoxanthin. It also contains powerful proteolytic enzymes like papain and the bioflavonoid isotheiocyanate.

**Plantago Ovata:** A common European perennial, it is used medicinally as an astringent, demulcent, emollient, and expectorant. It achieves this end by absorbing large amounts of water and other compounds, effectively, “sweeping” the intestinal lining.

**Ginger:** The root is used medicinally and is especially beneficial for compromised digestion, heartburn, vomiting, nausea and motion sickness.

**Grapefruit:** Grapefruit is high in fiber, potassium, vitamin C, and pectin. It also contains bioflavonoids such as naringin. Often used as antiseptic and antimicrobial agent.

**Pumpkin Seed:** The seeds are used in herbal medicine and are rich in carotenoids, including lutein, carotene, and beta-carotene.

**Slippery Elm:** The inner bark is medicinally used because it produces large mucilage cells (gummy substances) that assist in removing excessive mucous and other undesirable components. It is traditionally used for its ability to soothe mucous membranes and because it generates the correct environment for health-enhancing bacteria in the G.I. tract to grow and thrive.

**Black Walnut:** Contains natural chemicals called tannins and quinone, traditionally used for their anthelmintic properties. This ingredient displays aggressive activity against bacterial and fungal pathogens that are common to GI dysbiosis.

**Oregon Grape Root:** Contains berberine and hydrastine; both potent, botanical alkaloids. Berberine is a bitter herb that supports immune function and encourages the body’s purging of toxic substances and harmful micro-organisms. It exhibits broad spectrum activity inhibiting fungal, yeast and bacterial proliferation.

**Wormwood:** Is native to Asia and used for more than 1000 years as an anthelmintic. It is a bitter herb and, as such, stimulates the digestive system.

**Rosemary:** Used to treat insufficient bile flow through its bitter action and essential oil. The volatile oil is a potent bacterial inhibitor and also a spasmolytic of the gastro-intestinal tract.

---

**Our Guarantee**

The Mt. Capra farm is located in the Pacific Northwest. Our grass-fed, free-range goats graze on pesticide-free and chemical-free pasture 365 days a year. No hormones, antibiotics, or pesticides are used. Ever.

---

Do not use if you are pregnant or nursing. If you have a medical condition or are under the age of 18, consult your physician before using this product.

---

Caprylic acid is the major ingredient in our caprylic products. This non-polar fatty acid is water soluble at room temperature and has an unique ability to solvate and transport large hydrophobic molecules through aqueous systems. It is sequestered by membranes and acts as an ideal activity enhancer. 

This product is not intended to diagnose, treat, cure, or prevent any disease.
